Support Services

Portals Will Be A Big Problem

- Your Servers May Have Less Speed (Bandwidth) with the purchase of your domain name.
- To Buy High Bandwidth, you have to Pay More AND still you have less bandwidth for large data such as biodata of a candidate with Images, certificate image and licenses.
- The data is stored in a remote place and so if you want to show it when network is not available then you have a problem.
- Portals is only a buzz and not necessary for a recruitment company.
- You CAN build recruitment software with network capabilities which is NOT a portal and NOT browser based.
- An example of such a system is BioBuilder Version 2.5

Why Browser when It Is Slow?

- Unless it is an application such as Orkut or facebook or yahoo.com, you really don't need a browser application.
- What you need is network connected software such as BioBuilder Version 2.5
- BioBuilder Version 2.5 connects to your Lan and data gets transferred through network connections, may it be internet and it is high speed because it executes in your system and not in a remote server where you have low space and low memory.

Again, you need browser for Orkut, Facebook or yahoo like application. NOT FOR RECRUITMENT application like your company needs.

BioBuilder Version 2.5 Functioning.

BioBuilder Version 2.5 Deployed locally and Across Various Branches with data being accessed from evrey where.

Features of BioBuilder Version 2.5

- Input Screen, the same as the paper form for overseas recruitment companies. All fields collected for a candidate with heavy validations and automatic fills.
- Passport entry duplicate checks to avoid multiple entries.
- Experience and interview logs for each candidate.
- Search on all the fields such as post applied, qualifications, companies worked, experience and many other criterias.
- .PDF creation of resume with water mark of your company.
- Send emails to your clients with attachment to PDF.
- Print to any printer with certificates or images of scanned passports with personal passport size photographs.
- View images, zoom in and out.
- High speed data entry for re-use of man-power. Identify candidates once and retain them.
- Fulfill client requirement upto the client satisfaction with high speed turn around time, efficient recruitment process and to the satisfaction of candidates.
-Because Candidates are important.

Standards

- Screens compliance with required format.
- Government regulations if any can be directly applied.
- Approvals being sought and worked out.
- Easy 30 minutes client installation and 30 minutes server installation.
- Stand alone versions too.
- Cost efficient. Pay once and forget. (Unlike any other job portal)
