RiverLog works with enterprises in deploying an ESB solution. RiverLog has specialized in deploying various off-the-shelf ESBs such as GlassFish ESB or earlier called as OpenESB, IBM Websphere ESB, Weblogic OR Oracle suite, JBOSS ESB, and MULE. RiverLog's support for **architecture frameworks** includes re-usable design models suited to **typical business and architecture domains**

. Using best practices and suited requirements of clients, the company efficiently deploys ESB solutions which can fit within the middle-ware ownership domains. RiverLog can help you fill in resources, design artifacts, evaluate your design models and will justify if the solution is apt for your needs. We look into the following:-

- Does the ESB Solution best suited for your requirement ?
- What kind of proof of concept have you tried ?
- Time frame.
- Quality of service
- Final deployment and Performance considering SLA's.

Shoot us an email and we will be more than excited to discuss with you. mail us @ info at riverlog.com
